## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the closest prior art reference, Richards, US Patent 4,237,341 discloses a portable public address system with a hollow tubular housing having a main body portion with speakers 13 and 14, and microphone 76. As shown in figure 9, the main body portion contains a control panel 37. However, there is no disclosure or suggestion to have a perpendicular branch portion or a tubular plug member having a two way omni-directional speaker secured therein, removable inserted into one end of a main body portion of the portable public address system, as required by claim 1. Menarik discloses a portable mountable public address unit also, however, the allowable feature described above is not taught nor suggested, therefore claim 1 and its dependents, claims 2-11 are allowed.

Independent claim 12 requires first and second tubular plug members that can be removably inserted into an elongated hollow tubular case wherein the first tubular plug member has at least one elastomeric isolation member attached externally thereto and the second tubular plug member has an external handle and internal spool members. Richards nor Menarik disclose removable first and second tubular plug members. As a result, claim 12 and its dependents, claims 13-20 and 23 are allowed.

Lastly, independent claim 21 also recites first and second tubular plug members that can be removably inserted into an elongated hollow tubular case wherein the first tubular plug member has at least one elastomeric isolation member attached externally thereto and the second

Art Unit: 2644

tubular plug member has at least one externally mounted horn type speaker. Richards nor Menarik disclose removable first and second tubular plug members. As a result, claim 21 and its dependent, claim 22 is allowed.
